Aleksandra Rzepecka

{ Front-end Web Developer }

</ Summary>

Certified **Frontend Web Developer** with ~ **5 years** of working experience in both **startup** and **scale-up** environments developing web applications primarily in **React** and **Next.js** with **TypeScript** and data-driven UI's with **GraphQL .** Strong foundations in **JavaScript**, **Tailwind, CSS** as well as **UX design**. Experience in building scalable modern features.

</ Experience >

2023 - current

Front-end Developer - Lurkit

Development of a marketing platform connecting companies and creators within **gaming industry**. Building client-side using **Next.js** framework with **Typescript** and **JavaScript, Tailwind CSS** for styling, **Zustand** for state management as well as **GraphQL with SWR** for **delivering** data-driven scalable frontend solutions.

- Key contributor the migration/porting of a legacy **React** application to **Next.js** which reduced technical debt and supported product scaling and growth during the company's transition from startup to scale-up.
- Recognised within the team for a major contribution in a successful delivery of a feature prototype under a tight deadline, presented at **Gamescom 2024** which directly supported new clients acquisition.
- Actively collaborated with the team and leads to ensure solutions met long-term technical and product requirements.
- Work primarily in a fully remote team, relying on open and proactive communication and taking initiative to clarify development details.

2022 - 2023

Web Developer - OhCleo AB

Working as a part of a small startup team developing a web based platform with audio stories built with **React**-based **Next.js** framework with **Typescript.**

- Sole responsibility over implementation of a front-end logic and UX design.
- High involvement in the product UX design collaborative processes.
- Took an initiative in suggesting following **Agile** methodology and **Scrum** framework to the company which improved development processes.
- Launching of the platform succeeded with over 20k active users within the first week

2021 - 2022

Front-end Developer Intern - OhCleo AB

LIA (*lärande i arbete*) Internship as a part of **Hyper Island** education. As an intern I directly took on a role of front-end developer building and later solo maintaining company's website built on **React** with **JavaScript** using **Gatsby.js** integrated with **Contentful** as CMS and **GraphQL** API query language.

</Education>

2020 - 2022 **Front-end Developer Program** - Hyper Island

2020 **Programmering 1 C#** - Hermods

2018 - 2020 **Svenska som andraspråk** - Jensen Education | NTI Skolan

2012 - 2015 **High School** - IX Liceum Ogólnokształcące, Gdynia
